

IT TOOL

PRACTICAL 1

CREATING ACCOUNT, REPOSITORY ON GITHUB AND CLONING REPOSITORY IN GITHUB PAGE

1) to create an account on hithub

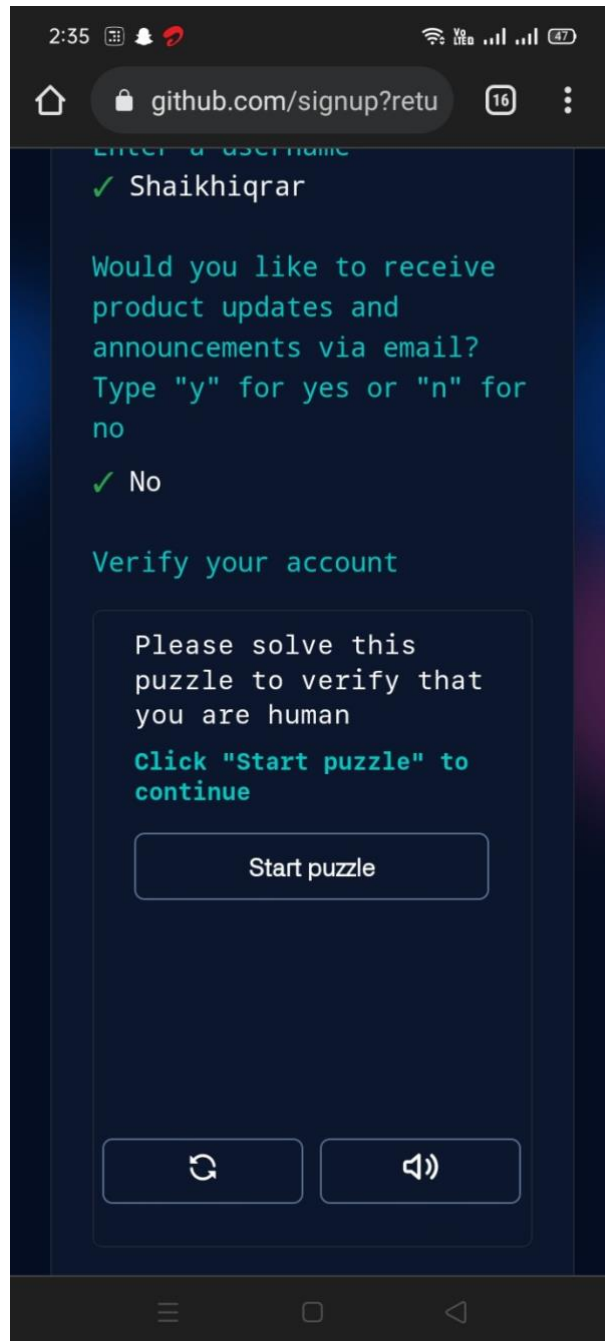

Step1: Go to <http://GitHub.com> in a web browser and then create a account. First write a email, create a password and surname

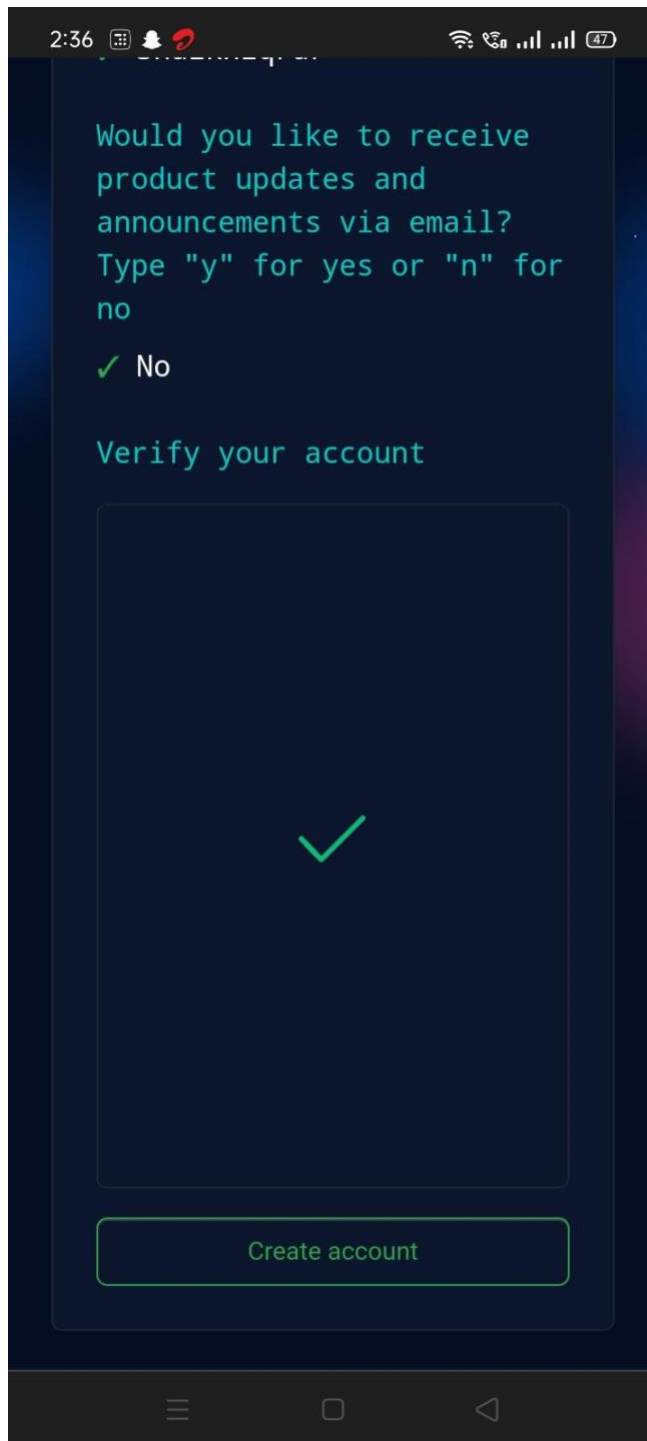

Step2: then there will be some questions and answers we have to fill it

Eg: 1) would you like to receive product updates and announcements via email? Type "Y" for yes or "N" for no?

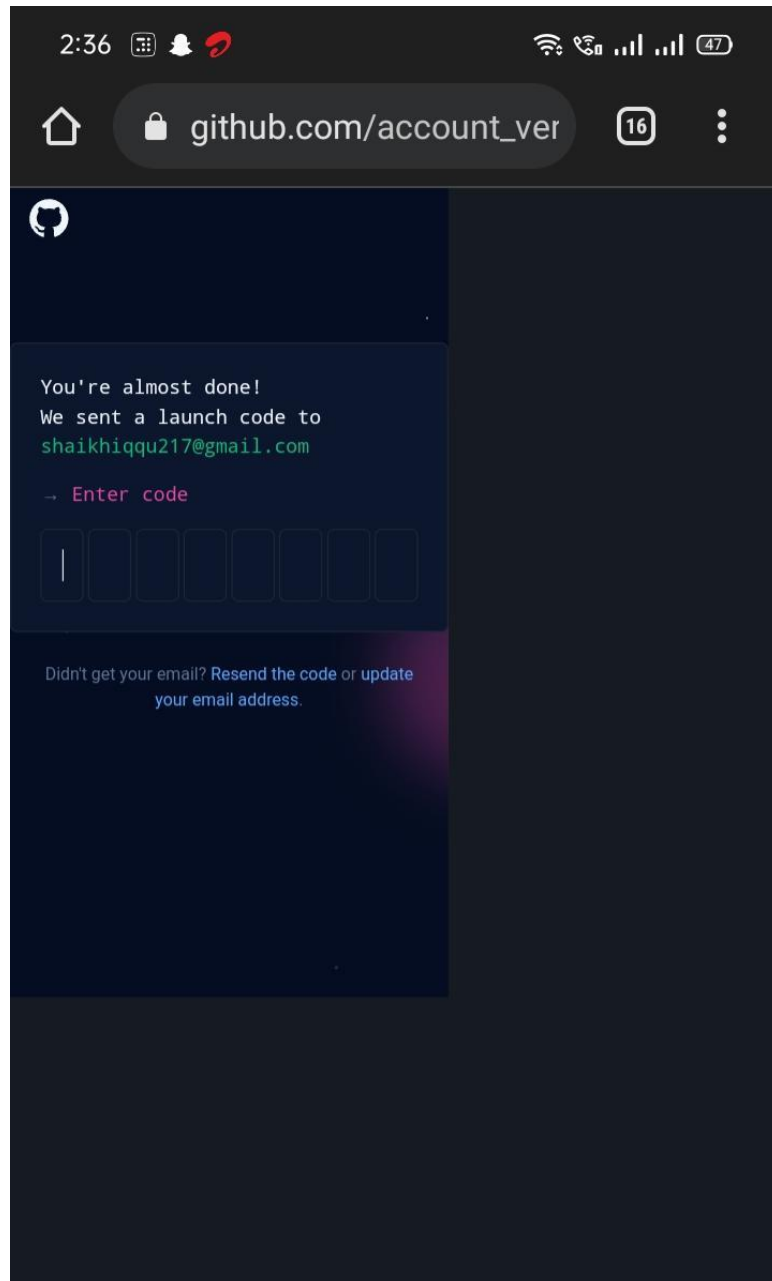

2) please solve this puzzle to verify that you are human

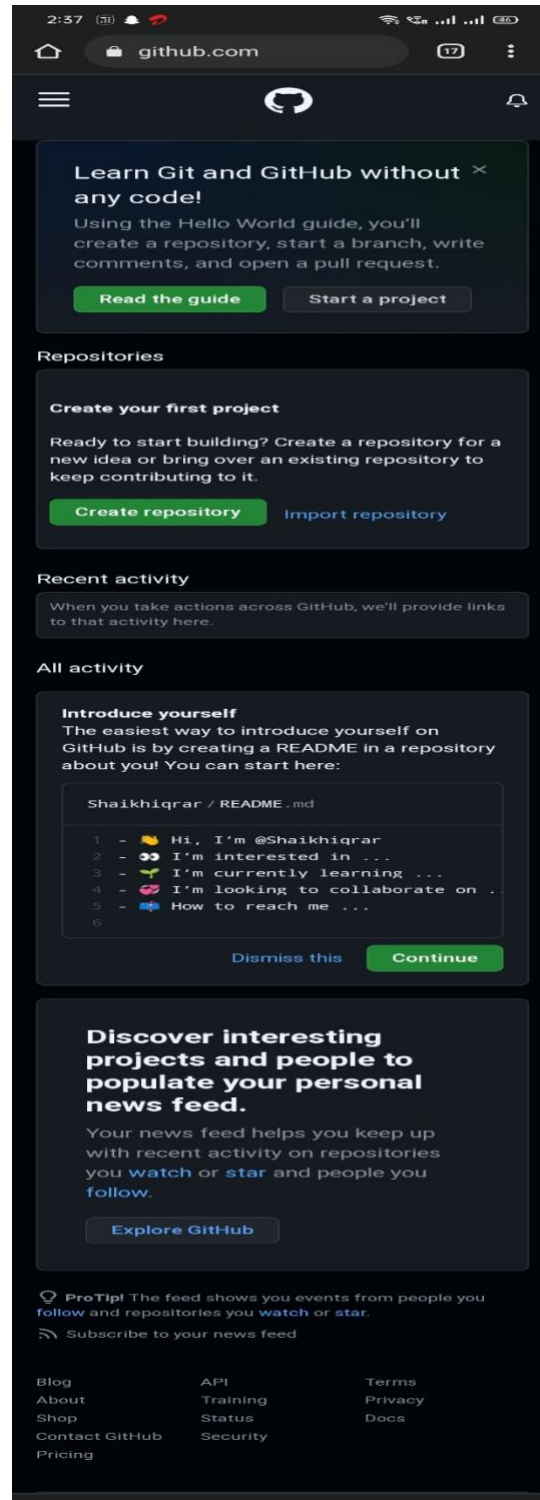

Step 3: At the end there will There will be option called create a 8ccount we have clicked there

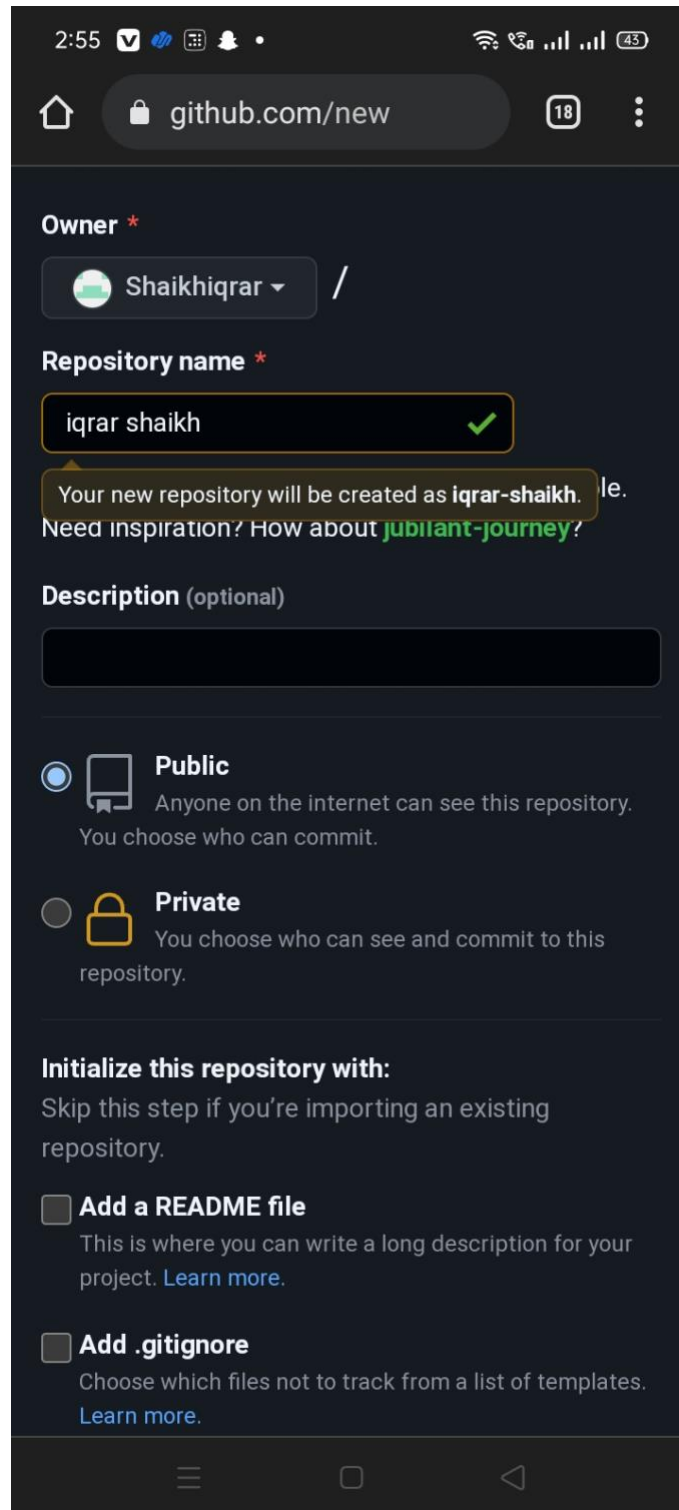

Step4: After on clicking “ created account” OTP will come on e-mail I’d ,we have to copy the OTP and paste on page

Step5: After copy and paste, new webpage will open In this page you will see your introduction yourself and option of creative preposition

Step6: After clicking new repository option, we will have to initialize some things like, naming our project, choosing the visibility etc. After performing these steps click Create Repository button.

The screenshot shows the GitHub 'new' repository page on a mobile device. The browser address bar shows 'github.com/new'. The page is titled 'Owner' with a dropdown menu showing 'Shaikh iqrar'. Below this is the 'Repository name' field, which contains 'iqrar shaikh' and has a green checkmark. A tooltip below the field states: 'Your new repository will be created as **iqrar-shaikh**. Need inspiration? How about **jubilant-journey**?'. The 'Description (optional)' field is empty. Under the 'Visibility' section, the 'Public' option is selected with a radio button, and the 'Private' option is unselected. Below this, the 'Initialize this repository with:' section is shown, with the instruction 'Skip this step if you're importing an existing repository.' and two checkboxes: 'Add a README file' and 'Add .gitignore', both of which are currently unchecked.
